

WHEN IS IT TIME FOR MY CHILD'S SECOND DOSE?

The CDC recommends that children age 6 months to 9 years old get two doses of H1N1 vaccine. Study of the vaccine found that only 1 out of 4 children under age 10 who had gotten just one dose of H1N1 vaccine developed enough antibodies to fight off the flu, leaving them vulnerable to H1N1 influenza illness. Below is a list of locations and dates on which the Huron County Health Department held H1N1 vaccine clinics, and when the second dose can be given. You can find a list of the H1N1 vaccine clinics scheduled in Huron County at www.huroncohealth.com under "Huron Health News."

H1N1 Vaccine Clinic Location	H1N1 Clinic Date for Dose 1	Preferred 28 Days for Dose 2	Minimum 21 Days for Dose 2
