Huron County Public Health

Huron County Public Health COVID-19 Weekly Update

March 18, 2022

Report Summary

This report covers Huron County's COVID-19 update for the reporting period of 3/11/2022 -3/17/2022. The reporting period has recorded a case count of 7 cases, a decrease from 16 for the previous reporting period. The average age of cases for this reporting period has decreased from 62 to 46, with a tie for the highest number of cases for this week reported in the 51-70 age range. There were only 4 Huron County zip codes with reported cases this week, with the highest infection rate in the Bellevue (44811) zip code.

Please Note: Case counts included in this report are estimates for the reporting period based on reports generated from the Ohio Department of Health (ODH)'s Ohio Disease Reporting System (ODRS). These data may be impacted by several factors, including but not limited to:

- Lack of reporting individual cases (for example, if a self-administered at-home test kit results positive but individual case information is not reported to HCPH or recorded in the ODRS, this case will not be counted by ODH or included in this report); and
- Reporting delays with the electronic reporting of cases, especially during surge periods.

COVID-19 Case Data

U.S. Overview

The images below were taken from the CDC's new U.S. COVID-19 Community Levels Tracker at: https://www.cdc.gov/coronavirus/2019-ncov/science/community-levels-county-map.html. Community levels are determined by summarizing data of the following information: New COVID-19 cases per 100,000 population, new COVID-19 admissions per 100,000 population, and the percentage of inpatient beds occupied by COVID-19 patients. Huron County is currently categorized as **low**. In communities with **low** levels of COVID-19, it is recommended to stay up to date with COVID-19 vaccines and boosters, maintain improved ventilation throughout indoor spaces when possible, and follow all CDC recommendations for isolation and quarantine, including getting tested if you are exposed to COVID-19 or have symptoms of COVID-19.

Huron County Community Level as of 3/17/2022:
