Sewage Treatment System Designs

Huron County Public Health (HCPH) provides this information to assist owners in obtaining a construction permit for a sewage treatment system (STS). The health district issues permits for both household and small flow on-site sewage treatment systems and gray water recycling systems; whether, it's for new construction, replacement, alteration, or abandonment of a STS.

Enclosed are lists of STS professionals that can provide the services that will keep you moving through the permitting process. Also enclosed is an application for design review or for a design plan. Once there is an approved design, a construction permit may be issued.

Mark the property and protect all area(s) designated for sewage treatment. This office reviews the design as well as calculations for proposed sewage treatment. HCPH will also visit the site to ensure that it meets current sewage treatment rules. This process takes time.

Who else do I need to contact?

- Huron County Soil & Water Conservation (419) 668-4113 - Lot Splits
- Huron County Tax Map Office (419) 668-2021 - Lot Splits & Assigning Address Numbers
- Sewage system professionals. See attached lists.
 - Certified Soil Scientist
 - Sewage System Designer
 - Registered Installer

What is the process?

- 1.) Contact a certified soil scientist to have a soil evaluation completed.
- 2.) Select and provide the soil evaluation to a STS designer to have a STS designed. Mark property and protect all area(s) designated for sewage treatment.
- 3.) Submit the Address Assignment letter from Tax Map Office along with the attached STS Design Review Application and the appropriate design review fee.
- 4.) This office reviews the site and the proposed design for approval. If there are design issues, the approval process may take longer.
- 5.) When the design has been approved, an approval letter will be sent to the email and/or mailing address provided.
- 6.) Select a registered installer.
- 7.) Contact this office for the permit and to make arrangements for signing and paying.
 - a. Know who will be installing the STS.
- 8.) Come in to sign and pay for the permit and complete a Construction Permit Application. Once all required documents are completed the permit will be issued.
- 9.) Special approval is required for systems installed between November and April. Contact HCPH for details.

An equal opportunity provider of employment and services.

Type of Water System (*A permit is required from HCPH for the new installation or the new connection of a private water supply.): Munic Rural Water Other Public Water Supply

*New Private System (well, cistern, hauled, etc.) *Existing Private System (well, cistern, hauled, etc.)

Do you currently or plan to operate a home business?

Additional Notes/Comments:

Provide year and season of proposed installation:

Provide mileage and compass directions from nearest intersection/road to driveway:

1) The STS designer has been provided with all easements and/or property lines whether assumed or exact. **2)** The property has been identified with the assigned address and the property lines visibly marked/staked. **3)** All building(s) and STS area(s) are clearly identified and flagged for the on-site portion of the review. **4)** Measures have been taken to protect all designated STS area(s) from vehicles, equipment, dirt, and stone, etc. **5)** I understand failure to do so may result in disapproval of a design and rendering an area unsuitable for a sewage treatment system. **6)** I further understand special approval is required for systems installed in inclement weather and/or certain seasons of the year. In this case, I also understand that additional fees may be incurred.
